- Styled-components
- Live Person (AI chatbot)
- Web Accessibility (WCAG)
- Responsive Web Design
- Wireframe Design
- Web Performance Optimization

EXPERIENCE

Infosys
Dec 2021*

Senior Systems Engineer – React Developer

- Integral part of a collaborative team delivering a fully functional Internet banking application.
- Primary responsibilities include creating visually appealing and user-friendly interfaces.

PROJECTS

ANZ

- Developed a Responsive React-based internet banking web application with Redux for state management, styled using styled components, and implemented forms with Formik.
- Collaborated with stakeholders and cross-functional teams, providing valuable assistance during releases, and contributing to the overall development process.

ANZ-IBSC

- Solely designed and developed all UI screens for a web application dedicated to streamlining the onboarding process.
- Demonstrated self-reliance and proficiency in UI design and development.

AWARDS AND HONORS

- Received ANZ Appreciation Certificate for outstanding contributions to the ANZ and ANZ-IBSC projects.
- Recognized with the Succeed Together Team Award for collaborative excellence in delivering successful releases of IB application.
